The reason why the user is being blocked. Please be as calm and as reasonable as possible, giving as much detail as you can about the situation, remembering that the message will be publicly visible. Bear in mind that not all users understand the community jargon, so please try to use layman's terms.

How long, starting now, the user will be blocked from the API for.

Example: Local Chapters

Communities

People from all over the world contribute to or use OpenStreetMap. While many participate as individuals, others have formed communities. These groups come in a range of sizes and represent geographies from small towns to large multi-country regions. They can also be formal or informal.

Local Chapters

Local Chapters are country-level or region-level groups that have taken the formal step of establishing not-for-profit legal entities. They represent the area's map and mappers when dealing with local government, business, and media. They have also formed an affiliation with the OpenStreetMap Foundation (OSMF), giving them a link to the legal and copyright governing body.

The following communities are formally established as Local Chapters:

- OpenStreetMap Belgium
- OpenStreetMap RDC
- OpenStreetMap CZ
- OpenStreetMap France
- OpenStreetMap Ireland
- OpenStreetMap Iceland
- OpenStreetMap Italy
- Free Libre Open Source Software Kosova (FLOSSK)
- OSGeo Oceania
- GeoLibres
- OpenStreetMap Austria
- OpenStreetMap Germany
- OpenStreetMap Japan

My Prioritisation

Security Issues

Upstream Projects (that are blocking our work)

Important or Urgent PRs

Small PRs

Tricky or Large PRs

Work on long-term priorities

(e.g. DX, Linters, Bootstrap, i18n, RTL, Controller refactoring, Hotwire)

My Review Process

Do the tests pass in CI?
Read the code.
Is it straightforward? Understandable?
Does it meet larger project goals?

Clone branch and test UI locally.
Try alternative solutions?
Ask for any changes.

Successful? Merge PR.

Emotions

Am I being too critical?
Is this their first contribution?
Could it be their last contribution?
What will future maintainers think?

Why?
